

Build Your Own Quadcopter

Are you interested in building your own quadcopter, but don't think you have the skills to assemble or fly it? Then you will be interested to know that the Central Coast 3D User Group will be putting on special one day workshop at the Sands Inn & Suites sometime this fall on how to build and fly your own quadcopter from included 3D printed parts, quality motors & control electronics, all for less than \$300. Go to <http://www.cc3d.org/quad> to find out more and sign up.

CENTRAL COAST 3D

A user group for all things in the 3rd dimension... and beyond.
